SOURCE DESCRIPTION: Municipal Solid Waste Landfills that commenced construction, reconstruction or modification on or after May 30, 1991. These landills usually will have one or more leachate storage tanks. Many also accept asbestos containing waste which is placed in a separate section. Landfills which emit 50 megagrams or more of non-methane organic compounds (NMOC) are required to install a collection and control system which will control 98% of the collected NMOC. Landfills will have fugitive emissions from haul roads, stockpiles and yards.
